

Pioneer Paper of Arizona.

PRESCOTT, ARIZONA, WEDNESDAY, SEPTEMBER 23, 1903.

Fortieth Year.

PRESCOTT TEAM
WINS DIAMONDMorin Wins the Copper
Queen Trophy.A Good Attendance and Increased
Interest in the Territorial
Shoot.

The following is a list of those participating in the first day's shoot of the Arizona Sportsmen's Association:

Aitken, Miller, Tanner, Campbell, Jordan, Harrison, McDonald, Seaver, Burmister, Morin, Knoblack, Hawkins, Nelson, Muller, Purcell, Iron, Meredith, Pickett, Archambault, Morrell, Julian, Marks, Sessions, Bates.

Morin of Prescott and Tanner of Phoenix, tied for high average for first day with Burmister, of Prescott, second.

The second day's shoot has been well attended and the weather has been perfect for the occasion with the result that some splendid scores have been made. The arrangements for the ground could not be improved upon and the shooters are highly pleased with the ground. Bleachers have been provided so that those who enjoy watching the sport can do so with perfect comfort, some large pine trees acting as a shelter from the sun. There are about thirty shooters in the contests today, being an addition of seven over yesterday.

Event ten was tied by three shooters and first money divided equally.

Event eleven, \$10 added money, was also divided by three contestants for first money.

Event twelve, which was for the beautiful silver cup given by the Copper Queen Mining company and known as the Copper Queen trophy, was won by M. E. Morin, of Prescott, with twenty five straight.

Event thirteen, known as the Prescott Gun Club event, with \$25 added money, was won by Seaver, of the Winchester Arms company, with twenty five straight.

Event fourteen, which was the principal event of the entire tournament, being for the beautiful association diamond medal, valued at \$300, and is for the four men team championship of the territory. The following teams contested for the medal:

Jerome team—Miller, 42; Jordan, 44; Campbell, 43; Hawkins, 42; total 171.

Phoenix team—Aitken, 42; Tanner, 49; Harrison, 44; Morrell, 44; total 179.

Prescott team—Morin, 45; McDonald, 44; Burmister, 47; Pickett, 44; total 180, thus winning the medal by one target.

Program for Sunday, September 20, 1903.

Event No. 19, Eye Opener, fifteen targets, entrance \$2.50.

Kohlberg event No. 20, twenty five targets, entrance \$2.50, added \$25.

McVeigh Handicap event, No. 21, twenty five targets, entrance \$2.50. Conditions to be adopted by captains of clubs before the event takes place.

Burke & Hickey event, No. 22, twenty five targets, entrance \$2.50, added \$25.

Event No. 23, twenty targets, entrance \$2, added \$20.

Event No. 24, twenty targets, entrance \$2, added \$20.

Event No. 25, twenty five targets per man. 1st Extra.

2nd Extra.

Besides the cash prizes, the following prizes have been donated:

Hunter Arms company, gold medal, to be given for the longest run of straight breaks of nine rocks during the tournament. Any run made in any event, whether regular or team shoot, will be counted.

E. E. McVeigh, fine gun case, scaled conditions.

Pacific Hardware and Steel Co., fine gun case, conditions to be made before shoot.

N. P. Sessions, carrying set, scaled conditions.

Brown Bros., Lager pistol.

Winston, pump gun.

Peters Cartridge company, case of loaded shells.

Saturday afternoon, Event fifteen, known as the Palace event, was won by Harrison, of Phoenix, with twenty-five straight.

Event sixteen, miss and out, was won by Aitken, of Phoenix.

Event seventeen, Winner event, was also won by Aitken, the prize being a Winchester pump gun.

Event eighteen, Brown Bros. event, was won by Morrell, of Phoenix, the prize being a Lager pistol.

On account of a number of the visiting shooters from the southern part of the territory desiring to go home on the Sunday evening train, it was decided to hold the annual business meeting and banquet Saturday evening.

The banquet was served at the Burke hotel and was a very gorgeous affair. Jake Marks, president of the association, presided with ease and dignity and the members of the association and their invited guests did full justice to the bounteous feast spread for them. There was a man every man in on every event and broke straight.

After the banquet the members repaired to the reading room of the hotel and held their regular business meeting.

As the live bird feature of the association had been eliminated from the tournament there was one live bird medal in the possession of the association which had not been disposed of and it was decided to make it a sweepstakes medal to be shot for on Sunday, and to have it re-conferred with the winner's name and the event and the winner to own the medal.

Tucson was then decided upon as the place to hold the next shoot and another vote decided to do away with the banquet at all future meetings of the association.

The officers for next year were elected as follows: President, George Julian; secretary, Kirk Hart; treasurer, J. T. Rhonstant, all of the Tucson gun club; vice presidents were chosen as follows: Tucson, Dr. Purcell; Jerome, J. A. Knoblack; Phoenix, J. A. Knoblack; Wink, Adams; Prescott, D. D. McDonald.

A vote of thanks was extended to the gun club of Prescott for the splendid manner in which they had entertained the visitors, and also to the business men and others of the city who had donated many handsome and valuable prizes.

The attendance at the shoot Sunday, the last day was very good, there being a big crowd present in the afternoon. The blue rocks suffered terrible slaughter, some remarkable records being made.

Event nineteen was won by Tanner with a score of 45. He had the good luck of a heat of friends in their sudden rise from poverty and toil to a life of ease and luxury for the balance of their days—Chloride Arrow.

P. N. Nissen, manager for Douglas Lacey & Co., in this section, informed the Journal-Miner that the work of putting in the concrete foundations for the new mill at the Home Run mine on Groom Creek, are all completed and the work of raising the frame of the mill well under way. He says the foundations for the mill are as fine as anything he ever saw in that line, being ten feet deep and as firm as the granite mountains themselves. The work in the mine is being pushed forward with all possible haste in order to have plenty of ore ready for the mill when completed so that the stamps may be started up for continuous work. Two prizes have been started, one from the 100 foot level to the surface and one from the 200 foot level to connect with the drift at the 100 level.

When these prizes are completed the work of stopping out the ore will begin and several hundred tons of good ore will be ready for the mill as soon as it is ready for operations, which it is thought will be about the first of December. He also reports good news from the Iron King ledge which was recently struck. The drift was about 145 feet west from the shaft when a winze was started down on the ledge. Although where the ledge was struck is about 100 feet below the surface is practically the top of the ledge. The ledge is covered with a wash to a depth of nearly 90 feet. Where the winze was started the ore vein is about eight feet wide and when down about 100 feet copper glaze commenced to appear in the bottom of the winze in strings from one to three or four inches wide and it is almost a certainty that they will come together and form a solid vein of copper glaze or when a little greater depth is attained. The eight feet of carbonate where the winze was started averaged nearly seven per cent copper, and Mr. Nissen feels very highly rated over the prospects of the property.

A contract has recently been let for a 300 foot tunnel in the Copper Queen property near the great Iron King mine.

The new hoist at the Rapid Transit mine, the Crown King section, was started up this week. The working shaft on the property will be sunk 100 feet deeper and levels will then be run. The ore from the north drift is being sacked for shipment to the Val Verde smelter and things look mighty good for the future of this small known property. The new assay office has also been put in commission and is well equipped for testing the values of the ore that is taken from the mine. This property is surely destined to be one of the big producers of the Bradshaw at no very distant time. In fact that section is going to give to the mining industry in this part of the west quite a number of good mines as well as the railroad is completed, which will be in a few more months.

The Journal-Miner is in receipt of a prospectus just issued by the Dividend Consolidated Gold Mines company which is just about the finest thing in that line that has ever come to its notice. The Dividend Consolidated Gold Mines company is a new company organized by some of the leading men of California and includes some of Prescott's well known mining men, and they have secured eleven of the most promising claims near McCabe, and is a consolidation of the following well known mining companies: The Dividend Gold Mines Company, The Galena Gold Mines Company, The Independence Company and The Comstock Company. Preparations are being completed now to work these properties on a very large scale, and the dividend for the year will witness this one of the large paying companies of the county. The properties are going to be thoroughly developed before any dividend are promised, so when the time for paying dividends arrives there will be something to pay those who are holding the stock in the further operations of the property.

Some ore was recently encountered in the Bradshaw Gold Mining company's Henrietta mine which is rich in gold. The Journal-Miner was shown some samples of the ore that were taken out of the vein by Mr. Redick, of Chicago, during his recent visit to the mine, and they were nearly half gold. It course there is no large quantity of this kind of ore but the ore that is being taken out of the place where the old and new workings came together is averaging way up close to the 800 mark. The mine is looking better all the time and that is saying a good deal for the property. The best in the country and the big gold lode has been coming in with clock like regularity for over a year past.

The Walnut Grove section is receiving quite a good deal of attention of late. E. L. Johnson has a mill on the property and the ore that is being taken out of the place which will be put in operation on his property in a few months.

The three shafts, to a depth of 100 feet each, as was originally intended, and Messrs. Dempsey & O'Dea will obtain their first payment of \$50,000 as soon as the crosscut is completed. Think of it! If the deal goes through the sale of this prospect is without a parallel in the annals of mining history in Arizona. The owners receive \$50,000 down and the additional sum of \$200,000 at the expiration of six months with the deepest shaft only 54 feet deep. It is five miles of the original price paid for the already famous Gold Road mine and is as yet only a prospect. The ore in all three shafts has steadily held its value and probably could not be purchased today for a cool million dollars. The Pilgrim group is destined to become the greatest dividend paying the west has ever known. The crosscut will tap the hanging wall at a distance ranging between 30 and 50 feet and will be completed in less than twenty days. Messrs. Dempsey & O'Dea are not only deserving of the good fortune, but have the good luck of a heat of friends in their sudden rise from poverty and toil to a life of ease and luxury for the balance of their days—Chloride Arrow.

The Pilgrim group is destined to become the greatest dividend paying the west has ever known. The crosscut will tap the hanging wall at a distance ranging between 30 and 50 feet and will be completed in less than twenty days. Messrs. Dempsey & O'Dea are not only deserving of the good fortune, but have the good luck of a heat of friends in their sudden rise from poverty and toil to a life of ease and luxury for the balance of their days—Chloride Arrow.

The three shafts, to a depth of 100 feet each, as was originally intended, and Messrs. Dempsey & O'Dea will obtain their first payment of \$50,000 as soon as the crosscut is completed. Think of it! If the deal goes through the sale of this prospect is without a parallel in the annals of mining history in Arizona. The owners receive \$50,000 down and the additional sum of \$200,000 at the expiration of six months with the deepest shaft only 54 feet deep. It is five miles of the original price paid for the already famous Gold Road mine and is as yet only a prospect. The ore in all three shafts has steadily held its value and probably could not be purchased today for a cool million dollars. The Pilgrim group is destined to become the greatest dividend paying the west has ever known.
